Ezra Arez Ráez

Full-Stack Web Developer
Photographer – Cartoonist

After three years in the film industry, I found myself drifting towards web development. All the things I loved from independent film making - community, creativity, passion - were present in computer programming. That same excitement of creating something on a massive scale lives within web development, but with an added bonus of objectivity.

WORK EXPERIENCE

Full Stack Web Developer & Lead Instructor / General Assembly
— Los Angeles, CA   09/2015 – present

- Wrote 10+ AngularJS applications as reference code for students
- Created numerous lessons around specific aspects of AngularJS, such as directives, services, or JWT authentication in front end frameworks
- Advised 60+ projects using AngularJS.
- Instruct the Web Development Immersive Course - a 12-week bootcamp for adults
- Write and deliver lessons on modern technologies to new programmers
- Learn countless technologies to assist student projects in a variety of languages
- Given the highest rating of any Los Angeles Instructional Team in GA's History
- Started as Instructional Associate and promoted to Junior Instructor in January 2016
- Promoted to Instructor in March of 2016, and Lead Instructor in September

Freelance Digital Producer / Dreamworks TV — Santa Monica, CA   02/15 – 05/15
- Wrote, produced, & directed the children's webseries, "Games Against Boredom"
- Staffed an entire crew and managed a $4000 budget
